# January 2026 Region 2 Regional Response Team Meeting

## Proposed RRT Subcommittees

- Community Air Monitoring Plan
- Cultural, Historic, Environmental Resources
- Training & Exercises
- Spill Response Countermeasures
- Regional Contingency Plan

Region 2 Regional Response Team (RRT2)

Working together to protect against threats to our land, air and water

- **Community Air Monitoring Plan (CAMP) Workgroup**
- **Objective: Develop baseline air monitoring plan for collective use by the RRT2 response community which categorizes and tiers air monitoring equipment, outlines information flow and roles and responsibilities for air monitoring by member agencies, and includes an air monitoring checklist, template and other response tools**
- **Regional Contingency Plan Subcommittee**
  - **Objective: Establish Five-Year Review Cycle to update the Region 2 Regional Oil and Hazardous Substances Pollution Contingency Plan (R2RCP) and Appendices**
- **Training and Exercise Subcommittee**
  - **Objective 1: Proactively identify and facilitate training and exercise opportunities that strategically enhance planning, preparedness, and response capabilities for incidents involving oil, hazardous substances, and all hazards, aligning with the RRT2's mission and goals**
  - **Objective 2: Coordinate with RRT2 Member Agencies to identify exercises of opportunity where are can be candidates for inclusion of an Incident-Specific RRT activation to be included in the design**

- **Cultural Historic and Environmental Resources Workgroup**
  - **Objective 1: Develop Cultural Resource Guidance tools and training materials to support Federal OSCs**
  - **Objective 2: Update and/or create procedures for when natural resource trustee agencies must be notified by an OSC/RPM as required by the NCP**
- **Spill Response Countermeasures (SRC) Workgroup**
  - **Objective: Develop/refine response countermeasure strategies to assist the response community for spill response**
    - **Develop procedures and protocols for an expedited request, review, and approval process for the operational use of dispersants and other chemical countermeasures, inclusive of the use of existing guidance for required environmental emergency consultations, including procedures to address requests for use of surface washing agents within both the coastal and inland response zones.**
    - **Develop educational outreach materials which address the issues related to the use chemical countermeasures and process for seeking authorization for use.**
